

Business Application Assessment

Am I making the best use of IT technology to achieve a high-performance business?

Nowadays, IT technology is an essential component for organizations to support their business and operations. Organizations often implement different IT solutions to achieve a variety of business objectives. Some want to integrate back-office information to cut processing costs and gain efficiencies. Some seek greater worker productivity and performance. And some want to simplify transactions for their customers or suppliers. Yet all seek improved business performance.

Our **Business Application Assessment** is the first step to address your variety of business objectives, helping you to bolster process efficiency, boost workforce productivity, slash operating costs, and enhance employee and customer satisfaction in order to achieve a high-performance business.

With our functional and non-functional expertise, we help you design and implement the enterprise class solution that is right for your business. We integrate your organization's critical information. More importantly, we help you access and use this information in innovative ways to make better business decisions.

Scope

- Typically looking into the key enterprise processes, which include Finance, Distribution and Manufacturing.
- Analyzing your information and reporting requirements and how to employ the right technology to effectively support your business decision making.
- Seeking a change to the process by employing better choice of technology or applications integration to achieve streamlined business processes.

Requirements

Your organization will need to provide key resources who are knowledgeable in business processes, existing applications, reporting, and infrastructure. Upon the project kick-off, we will provide an agenda that details the logistics for their participation.
